Message from the Principal

We're starting another school year still in the midst of the pandemic. Yet, our learning isn't slowing down, and we haven't stopped improving. Half-day school means lesson time has shortened and most after-school activities cancelled, which has had an impact on our students' development and wellbeing. Fortunately, technology has created great tools that can give us online learning activities and increase students' learning capacity.

Technology is the key to the future development of society. Therefore, we have expanded the Technology Education curriculum in the past few years. For example, we have joined "CoolThink@JC Computational Thinking" organised by the Hong Kong Jockey Club, planned by The Massachusetts Institute of Technology, The Education University of Hong Kong, and City University of Hong Kong. Starting from the last school year, P.4 to P.6 students have participated in this coding curriculum and the learning outcome was very encouraging. In Multi-intelligence sessions, we have assigned students who have potential in Science, Technology, Engineering, and Mathematics (STEM) to the "Little Scientists" group for in-depth training. They have had amazing results in external competitions! Starting this school year, we are going to organise a "STEM Day" for P.1 to P.6 students during the post-exam period, to let them complete various STEM learning tasks. We will also instil STEM into different subjects for cross-curricular activities.

Our school will continue to find resources for Technology Education to equip students with the knowledge and skills ready to embrace the new era of high level technology.

2021-2022 Secondary School Places Allocation Result

50 students participated in the SSPA last academic year. They got their results on 26th July, 2022. 98% of our students were given places within their first three choices. Many of our students went to Band 1 schools such as Queen's College, King's College, Marymount Secondary School, SKHTang Shiu Kin Secondary School, Belilios Public School and St. Paul's Secondary School.

Congratulations to all P.6 graduates!

Second Term Speech Day

The 2021-2022 Second Term Speech Day was held on 5th August, 2022. Congratulations to all P6 graduates. The Kelvin Wong Scholarship — Great Talent Award and Principal Lai Wing Lin Scholarship were awarded on the same day. Congratulations to all the winners and thanks to Mrs. Lai and Ms. Lai for attending the ceremony.

Post-exam activities

Students learning during the post-exam activities period. Activities included the STEM Learning Day, Eslite bookstore visit, and a Rocket car competition.
